DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 and 18-21 are allowed.
2. The following is an examiner's statement of reasons for allowance: Masubuchi (U.S. Patent No. 5,530,817) and Cook (U.S. Patent No. 5,301,340) are the closest references. Examiner agrees with Applicants that Masubuchi cannot contemplate, nor does it teach or suggest, the need for switchability between global mode and private modes for a given register. Further, Cook does not contemplate, nor does it teach or suggest, the ability of the claimed invention to operate registers in both private and global modes. Further, Cook does not address switchability or selectability between private and global modes for registers. Therefore, Masubuchi in view of Cook does not teach or suggest each of the Q-number of registers is bi-modal to programmably operate in both private and global modes (in claim 1); each of the Q-number of registers is dynamically configurable to operate in both private and global modes (in claim 10); and each of the Q-number of registers is bi-modal to switch between private and global modes (in claim 11). Further, the combination of the set forth limitations with all of the

other limitations of the respective independent claims is not obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
